# STANDARD

According to the ISO (International Organization for Standardization) the minimum requirement for coloring strength is 190 to be considered grade 1, where our pure saffron goes way beyond that requirement; the coloring strength of our 100% pure saffron is 259.3 in the laboratory and we have not found any other commercial saffron which measures up to ours.

# Organic saffron:

There are many consumers around the world that are concerned about the health risks of synthetic pesticides and food additives.

In Iran Farmers don't use chemical material for cultivation. Our pure and natural Iranian saffron has **NO** synthetic pesticides, **NO** food additives, **NO** preservative substances, and **NO** synthetic food coloring so based on true facts, we can claim that our saffron is **ORGANIC SAFFRON**.
